The essay gives a thorough introduction to social cybersecurity while highlighting how important it has become to national security. It draws attention to the way information warfare is changing, especially when viewed through the prism of Russian methods, and the strategic ramifications for countries trying to protect their citizens from social manipulation. Particularly enlightening is the examination of how technology facilitates social cyberthreats and the decentralization of information flows. The paper also emphasizes how crucial it is to use interdisciplinary strategies and policy frameworks in order to successfully handle the difficulties presented by social cybersecurity. All things considered, it provides insightful information on the complexity of contemporary warfare and the need for improved awareness of and protection against social cyberthreats.
