

S2401

OCCUPATION BY SEX FOR THE CIVILIAN EMPLOYED POPULATION 16 YEARS AND OVER

2013-2017 American Community Survey 5-Year Estimates

Note: This is a modified view of the original table.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Technical Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities, and towns and estimates of housing units for states and counties.

Subject	Tangier town, Virginia				
	Total	Male	Percent Male	Female	Percent Female
	Estimate	Estimate	Estimate	Estimate	Estimate
Civilian employed population 16 years and over	181	112	61.9%	69	38.1%
Management, business, science, and arts occupations:	35	15	42.9%	20	57.1%
Management, business, and financial occupations:	29	12	41.4%	17	58.6%
Management occupations	29	12	41.4%	17	58.6%
Business and financial operations occupations	0	0	-	0	-
Computer, engineering, and science occupations:	3	3	100.0%	0	0.0%
Computer and mathematical occupations	0	0	-	0	-
Architecture and engineering occupations	3	3	100.0%	0	0.0%
Life, physical, and social science occupations	0	0	-	0	-
Education, legal, community service, arts, and media occupations:	3	0	0.0%	3	100.0%
Community and social services occupations	0	0	-	0	-
Legal occupations	0	0	-	0	-
Education, training, and library occupations	3	0	0.0%	3	100.0%
Arts, design, entertainment, sports, and media occupations	0	0	-	0	-
Healthcare practitioner and technical occupations:	0	0	-	0	-
Health diagnosing and treating practitioners and other technical occupations	0	0	-	0	-
Health technologists and technicians	0	0	-	0	-
Service occupations:	32	6	18.8%	26	81.3%
Healthcare support occupations	0	0	-	0	-
Protective service occupations:	3	3	100.0%	0	0.0%
Fire fighting and prevention, and other protective service workers including supervisors	0	0	-	0	-
Law enforcement workers including supervisors	3	3	100.0%	0	0.0%
Food preparation and serving related occupations	20	0	0.0%	20	100.0%
Building and grounds cleaning and maintenance occupations	2	0	0.0%	2	100.0%
Personal care and service occupations	7	3	42.9%	4	57.1%
Sales and office occupations:	11	0	0.0%	11	100.0%
Sales and related occupations	3	0	0.0%	3	100.0%
Office and administrative support occupations	8	0	0.0%	8	100.0%
Natural resources, construction, and maintenance occupations:	71	71	100.0%	0	0.0%

Subject	Tangier town, Virginia				
	Total	Male	Percent Male	Female	Percent Female
	Estimate	Estimate	Estimate	Estimate	Estimate
Farming, fishing, and forestry occupations	63	63	100.0%	0	0.0%
Construction and extraction occupations	3	3	100.0%	0	0.0%
Installation, maintenance, and repair occupations	5	5	100.0%	0	0.0%
Production, transportation, and material moving occupations:	32	20	62.5%	12	37.5%
Production occupations	8	2	25.0%	6	75.0%
Transportation occupations	24	18	75.0%	6	25.0%
Material moving occupations	0	0	-	0	-

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

While the 2013-2017 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural populations, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
