Syllabus Reflection

- 1) The tests look manageable as we have a whole week to complete them, so if I manage my time well, I should have plenty of time to complete it. I also am familiar with the test reflections as Professor Luetke did them as well and I will be taking advantage of the extra credit.
- 2) CONSTANT HALL Room: 1060
- 3) There aren't many assignments other than the problems due every week which should be manageable to do as long as I allocate my time correctly for each class.
- 4) I am confident in my writing skills and being able to articulate observations or findings regarding the research aspect of the course. I also am confident in my problem-solving ability and being able to stick with a problem until I get the correct answer.
- 5) There are 3 take home tests, 10 points of the 100 will be earned by completing the HW assignments with your group. The other 90 points come from the actual test where 10 of those points come from following the rubric and the correct writing structure of the solutions for all the problems. The other 80 are earned through following the correct procedure. Within this for each problem you must complete all steps of the problem in order to receive full credit for the question.
- 6) You are allowed to make up only 1 test, not including the last test. The test can only be made up during the week prior to finals week.
- 7) You can do test reflections for an extra 5 points on the corresponding test. You can also complete the e-portfolio for another extra 3 points towards your final grade.
