

Find Your Dream Job (100 Points)

Let's find your dream job! You will do research to find your dream job in the health field and what type of education and skills you will need to get this job. The purpose of this activity is to help you gain a better understanding of how your intended major, future education goals, and skills need to be applied to the career you want. **You will need to download your completed assignment as a PDF and add it to your ePortfolio under the "Dream Job" section in Assignments.**

1. To get started, complete the following quiz:

<https://advance.appily.com/careers/healthcare/quiz>

- What were your results?

- Did they surprise you? Why or why not?

I'm actually not surprised because this was a career I had already considered doing anyways.

2. Find at least 3 job postings that you would be interested in applying to that requires the degree you are currently pursuing or a degree you're interested in pursuing. Examples of where to search: Indeed.com, LinkedIn, USA Jobs, Glassdoor, or just Google the job you want to find! Copy and paste the job postings below. Answer the questions under each link in complete sentences.

- Job 1 Link:

<https://www.indeed.com/viewjob?jk=b4a3ad49d7e2a00d&from=shareddesktop>

- Identify the salary range: \$2,251.90 - \$2,488.37 a week
- How much experience would be required to apply for that job?

The profile doesn't state how much experience is required, if any.

- What degrees, certifications or training is required?

You would need an Rn license for this job.

- What skills are and tasks are involved in performing the job you have found?

The only skill listed that's needed is recruiting.

- Job 2 Link:
<https://www.indeed.com/viewjob?jk=d4f86dfc1b9f24dc&from=shareddesktop>
- Identify the salary range:
\$2,639.68 - \$2,909.03 a week
- How much experience would be required to apply for that job?

Attentive to all types of cancer diagnoses. Administering chemotherapy, blood components, fluid/electrolyte replacements and oncology treatments. Assessing patient conditions, managing side effects, offering emotional support to patients and their families. This traveler should display appropriate prioritization skills in a fast-paced setting.

- Job 3 Link:
<https://www.indeed.com/viewjob?jk=2d0a6ff41a6d718c&from=shareddesktop>
- Identify the salary range: \$29 - \$32 an hour
- How much experience would be required to apply for that job?
Experience in pediatrics or internal medicine is a plus.

- What degrees, certifications or training is required?

A RN license is required. Experience working with individuals with developmental disabilities is preferred. Proficiency in medication administration and familiarity with laboratory procedures. Knowledge of sterile processing techniques and infection control practices.

- What skills are and tasks are involved in performing the job you have found?

Patient care, medication administration, spinal tap, laboratory experience, pediatrics and communication skills

Reflection: From the 3 job postings you found, choose one job you want the most. Why does this job appeal to you the most? What skills do you already possess that would help you to get this job? Identify skills you are still building or need more experience performing. Discuss options to sharpen or learn the skills you will need to gain.

Out of all 3 Job listings I would want job number 3 the most. I liked job 3's job listing because on their posting they stated "Join our team of healthcare professionals dedicated to making a difference in the lives of our patients!" which I really liked because that is the whole reason for me wanting to go into the medical field.
