

Writing Assignment 3

Anastasia Bui

Charache, S. et al. Effect of hydroxyurea on the frequency of painful crises in sickle cell anemia. Investigators of the Multicenter Study of Hydroxyurea in Sickle Cell Anemia. The New England journal of medicine vol. 332,20; <https://www.nejm.org/doi/full/10.1056/NEJM199505183322001>

This article is genetics-related as it covers the relationship between hydroxyurea and pain in sickle cell anemia. It is also a peer reviewed article in The New England Journal of Medicine, that includes all the sections that are normally found in similar articles. For example, it includes a background, methods, results, and conclusions.
