LinkedIn: www.linkedin.com/in/Antonio-J-Young

SKILLS:

- **Programming languages:** C++, Unix, Java
- **Cybersecurity tools:** Wireshark, Autopsy, Zenmap
- Capable of adapting to new challenges and applying learned techniques quickly
- Well-established leadership skills
- Experience with Linux
 - Kali, Ubuntu
- Experience building computers.
- Experience with Windows
 - 7, 8, 10, 11

EDUCATION:

Old Dominion University, Norfolk, VA

Expected: May 2023

- Bachelor of Science: Cybersecurity
- Coursework included:
 - Cyber law: Had writing assignments that gave examples of different legal situations involving cybercrime.
 - Digital forensics: Lab work includes using remote lab to complete tasks related to collecting digital data and evidence.
 - Cyber techniques and operations: Using a remote window and Linux lab to find the basics of cybersecurity defense.

PROJECTS:

Cybersecurity:

- Testing projects:
 - Set up different remote testing environments to complete different tasks and tests. One such test includes using a Kali Linux and Ubuntu server to attack a windows server transferring files over to another IP. I used Wireshark to track the traffic going through and intercept a file being sent.
- Risk assessments:
 - Simulated the breaching of a network risk. I used a server on a remote network to break into another server on the same network, using vulnerabilities that existed already on the victim network. Wrote a report on what the vulnerabilities were and how they can be avoided.

WORK EXPERIENCE:

Freelance Technology Support Consultant – Self-Employed

June 2018 – Present

- Provided technology support for members of the community on a voluntary freelance basis.
- Built gaming PC and at home computer, installed and setup printers.
- Provided clients with training and suggested implementing security measures by installing firewalls, setting up VPNs, Avoiding certain sites and areas.
