Cyberbullying and Cyberbullicide Ideation Among Jordanian College Students review

Research used

Cyberbullying and Cyberbullicide are big factors in the everyday life of an internet user the things that are seen on the internet can be seen as malicious and very bad for people that are all across the globe. The main focus of this article stems from the country of Jordan using the people of Jordan and the social media they use as the main research for the article. With this we can see the true plans and ideas that are used to bring the hypothesis which is the finding of what the impact of cyberbullying on youth cyberbullicide ideation (Eremeeva et al., 2021). When we see the article the different information that is used is one of data that is used to bring the conclusion of the experiment. The researchers use 1000 Jordanian students were used for the data and they all had different experiences with the idea of cyberbullying and how it was in the internet that they used on a daily basis. Of the data taken the article says “Of these, 454 (45.4%) were males, and 546 (54.6%) were females. The sample comprised of 496 students (49.6%) from science colleges and 504 students (50.4%) from other colleges.” (Eremeeva et al., 2021). The data used is one of many creeds of Jordian students.

Relation to class

In class we talk about the cybersecurity principals and what they mean to the main cyber world that we are all apart of and that we use everyday. When we look at these principals we can understand in the many faucets of our internet usage that the research used in this article connects in many ways to what we have learned in class. The Integrity of the cyber world is one

of the main things that connects to the article because of the information that is being spread is one of misinformation and harassment online.

Conclusion

This article uses the data used to highlight the affects of cyberbullying on the youth in Jordan and by doing that we can connect it with what we learned in class. One thing that is true about cybersecurity is that it affects us in our everyday life this is something that this article proves.
