

Read this and write a journal entry summarizing your response to the article on social cybersecurity

Social cybersecurity seems to focus on the human factors of cybersecurity. As technology grows and evolves, the cybersecurity challenges and threats grow alongside it. There are countless cybersecurity threats out there and the biggest vulnerability to cybersecurity still remains to be people. Throughout the assessment of some different types of cyber-attacks and cyber threats within the article, the most common solution that continuously reappeared was educating users and creating awareness about the issues. In order to continue advancing social cybersecurity there needs to be more education and more surveys and studies about how users interact with their technology and other people and entities online.
