

Review the NICE Workforce Framework. Are there certain areas that you would want to focus your career on? Explain which areas are most appealing to you and which are least appealing.

The two career areas that I would want to focus my career on are the Investigation and Design and Development categories. Investigation careers interest me because I like the idea of gathering and organizing information for the purpose of solving crimes. On the other hand, I really like the puzzle solving aspects of Design and Development careers through creating and altering technology systems. The area that I find the least appealing is the Oversight and Management. I feel as though I would prefer to work on the technical side of cybersecurity work as opposed to the management and legal side of cybersecurity, because I think I would find the teaching and leading aspects of that career type to be very challenging for me.
