

### Improved Decision Making with Information Systems Assignment

Choose a company or organization and describe in detail how that company or organization is using information systems to improve their decision making.

Be as detailed as possible when showing the benefits that the company or organization is receiving such as: increased profits, improved efficiency, improved productivity, decreased costs, decreased waste, etc.

Also describe the company or organization's decision making process and how information systems play a role in that decision making process.

You can use any type of information system for this assignment.

Types of Information Systems:

Management Information System

Knowledge Work System

Decision Support System

Office Automation System

Transaction Processing System

Executive Support System

You can choose a company or organization that you currently work for or have worked for as well.

You can organize this assignment any way you choose including: sentences, paragraphs, bullet points, charts, tables, graphs, or PowerPoints.

Upload the completed assignment to Canvas by Sunday April 2 at 11:59 pm.
