

Securing Information Systems Assignment

Find an article related to cyber security. You can use an article with any topics related to cyber security. Write an analysis of the article. **Pay special attention to analyze and list the potential impacts, both intended and unintended, of cyber security technology on individuals, society, or the environment.** The following questions should be answered.

- What happened?
- Who was involved?
- Where did this occur?
- How did this happen? (lapse in security, mistake, etc.)
- What were the consequences/impacts? (individuals, legal, ethical, social, society, environment)
- What was done to address or prevent this from happening again?
- What are your suggestions to prevent this from happening again?
- Do you think this could happen again and why?
- What are the potential impacts including intended and unintended of cyber security on individuals, society, or the environment?

You can use any format you choose including sentence format, paragraph format, bullet points, lists, graphs, PowerPoint presentations, or any other format you wish.

Please be as detailed as possible.

Upload the assignment to Canvas by Sunday March 5 at 11:59 pm.
