

CAREER PATHWAYS

Professional development to bridge graduate school and career success

Research Data Management Planning

Research data management planning is the process of outlining how research data will be collected, stored, analyzed, preserved, and shared throughout the research project and beyond.

This workshop, offered by University Libraries, provides an overview of research data management planning and how it can help graduate students with their thesis, dissertation, and other research projects.

The workshop will cover topics such as:

- The basics of research data management planning
- The importance for graduate students
- Overview of the DMPTool

Tuesday, February 13, 2024 from 12.00–1.00 pm
Via [Zoom](#)

Can't make it to the workshop? Want to access the workshop on your own time? The recorded webinar will be available via the Career Pathways YouTube channel (<https://www.youtube.com/@oducareerpathways>)
