Essay Questions:

What changes, if any, could be made to the class that would have helped you to learn more? What could the instructor have done to make the course an even better learning experience?

Change quizzes
Different topics could have been discussed. It seemed like we talked about the same things every class.
Doing the reading in class or having less readings. There were a lot of readings to come up with and not a lot of time to read them all. I also think there should only be two test instead of three because I just do not really think there was that my content to be tested on.
have more in class extra credit work or more things to go to.
I think I had a great learning experience. The only thing I would change is to maybe cut us off if we get too talking too long because sometimes we didn't get to finish the last discussion because one group went too long.
I think it will be better doing individual work than group works every class.
I wish it was more than two days a week. I also wish we watched more videos and documentaries because I loved those.
I wouldn't make changes
If grades can come in at a timely fashion. It gave me anxiety that I didn't know what my grades were.
N/A, i feel like the instructor could have replied to emails more but i can understand if they're busy.
None.
Often times the class would go off on tangents that weren't directly related to the subject. Most of the time when this happened the conversation was very one sided and there was bias from the instructor talking about these things. I would suggest sticking to the course material more and having more evidence for certain claims or ideas that don't already.
Sometimes it was difficult to find time to watch all of the videos and readings given from the instructor. It doesn't help when i don't enjoy reading why is why i liked the videos.
You could give the teacher more time to grade her papers, or perhaps an assistant.

What could you have done to make the course an even better learning experience?

I could have been more proactive and participated more in class.
I could have read some of the required readings sooner, even the longer ones.
I could have contributed a little more in the class discussions
I could have taken notes on the podcast because I have a hard time just listening to someone talk for an hour
Leaving personal bias out of the course would make the class more enjoyable and significant.
N/A
None. Great as it is.
Not sure
nothing.
Spoke more in class
To read more of the readings and go to class more

What did you like most about the class and your instructor?

Class discussions
Going over the readings and talking about some situations that happened in real life that is relatable to the topic we're talking about.
How she let everyone talk and excepted everyone's opinions
How the instructor engaged with the students and how we could relate to what is happening in the world now, and compare it to what we are learning.
I feel as if the interactive study guides really helped when it can to the tests.
i liked how the professor showed us videos and did group discussions.
I think the only thing I really liked was our class discussions, and did not care for my professor much at all
She gave us interesting things to read and watch that were also educational.
She was enthusiastic, she used different types of teaching methods and got us to really think hard about the different topics. She was also really funny.
She was very willing to listen to students ideas or comments when it pertained to the subject matter. The group discussions made me think

differently about things and contribute to civil conversation.
The class and the instructor was really enthusiastic about discussing the learned material. Most of it was very insightful.
the class discussions about our readings and the group discussions
The information was never boring. It was a class I always looked forward to going to
The instructor was great and made the learning material very clear and made it into a very enjoyable subject. I loved that we discussed everything we learned in class it really helped me retain the information

What factors about this class contributed the most to your learning? What aspects of this class helped you to learn to think critically?

Class discussion helped me learn and interpret the information provided from multiple perspectives. While reading the course material, it would occasionally be required to think critically to understand the arguments or problems presented.
Class discussion was an important part of learning and critical thinking.
Class discussion.
Class discussions, readings, and educational movies.
I liked doing group activities in class about the readings/videos.
It really made me think critically about how societal stigmas have hindered women in the technological field and just in society in general.
learning new ways to study really helped me.
Nothing much. I did not learn that much in this class at all.
Open discussions
Talking about the readings each class
Watching documentaries
We did many group activities based on what we read.
We had to think about the history of what we talked about in class and how it relates to us today
When we created the study guide ourselves on google drive was helpful and to actually see those questions on the test was beneficial because it felt like we were contributing to our own learning process.

What factors about your own performance helped you learn the most? What did you do to facilitate your learning?

Doing all of the hw assignments and coming to class
Doing the readings and engaging in discussions.
I actually enjoyed the subject and tried to teach other about what I was learning which helped me retain the information
I always studied for the test and created my flash card.
I honestly felt like I had to teach myself and did not really learn anything.
I read the material and took notes from the material and lectures.
I was engaged in the class and the discussions that helped me remember the material better.
I watched everything she assigned.

Essay Questions:

What changes, if any, could be made to the class that would have helped you to learn more? What could the instructor have done to make the course an even better learning experience?

I believe that Ms.Rhodes was understanding if we did not have a chance to do the readings because we all have multiple classes we are taking and are working. She would throughly go over information prior to the test and she would help us in anyway we needed help. This was a heavy reading class but some of the readings were very informative. I also enjoyed how she utilized google docs for notes it allows everyone to see what was covered during class and if the person is not a good note taker at least there was notes for them to reflect to.
I can't think of anything that should be done differently.
I did not particularly enjoy the poster project. Being creative is fun but it felt like more technical work, and expensive to actually do. I understand the point of it but I feel like we could have done a different project.
I think that there shouldn't be as many readings , and maybe a couple more homework assignments
I think the class was fine the way it was.
I wish she was able to get grades back on time and reply to emails in a timely manner
I would say some changes would be not having less readings, but having the readings be shorter. I say this because I feel like I would've connected more without stressing about how much I had to read. The instructor really did their job and provided a good learning experience.
Instead of making the class do the syllabus she should just make them.
Less papers, more hands on projects. Reply to more emails.
less readings
N/A
NA
none
none
none. Class was great 10/10 recommend
not as much readings and every time i emailed my teacher i never got a response back regarding to my questions
Reply to emails faster
The changes I would make to this class is to have more reviews for tests and helpful study guides.
The google drive being more organized. The test only containing what was prepared for that test no old information.
With some of the readings, I think a lot of passages were too broad and I didn't necessarily know what to focus in on and study for. I think study guides should be more what topics should we pay attention to when studying. Saying things like birth control or workplace technology terms. Also make sure daily note takers are actually putting in good notes, sometimes notes for that class period would consist of like two sentences.

What could you have done to make the course an even better learning experience?

Attend all classes
attend more classes
Do more hands on activities to show off the learning like the post cards or the poster project. Super fun!
Had more discussions and more interactive content.
I believe i should have prepared more for the class. Test two really affected my grade in the class but if i would have studied more and completed the readings for this test, i believe i would have gotten an A for the class.
I could have done better with some of the readings, during the beginning of the semester I made more notes on what I read however, towards the middle I started slacking a bit.
I could have read more often and taken notes on the readings to better my learning experience in this class.
In class assignments that required a laptop to receive credit was difficult for me. I take notes by hand, which is more beneficial for me but did not get credit for being in class since I didn't have it online
Just making what to focus on in readings more of a thing and the note taker situation.
Look at more of the readings
Maybe participated more?
N/A
none
nothing. I attended every class & enjoyed every minute out of the four classes i had on Tuesday and Thursday i most looked forward to this one every week.
participated more

participated more.
payed more attention
Review successions
To make the course an even better learning experience, I could have attended one of the speeches on campus my instructor recommended to help tie in our course material with real world examples.
Try and dissect the readings to make sure I understand

What did you like most about the class and your instructor?

basically everything
Enjoyable and informative
great personality
Her upbeat spirit and sense of humor made it easy to stay engaged in the material.
I enjoyed our discussions. Our professor is open minded and down to earth which helps students to relate.
I enjoyed the class. I learning a lot of things about women history in technology that i did not know. I think everyone should take this class if they have the chance to.
I like how it was very easy to learn the things in this class as long as you studied and how she goes over things that are useful in this class
I liked how comfortable everyone is and that we could talk about anything in front of our professor. My instructor made me feel comfortable with saying my opinion.
I liked how there was an overall feeling of comfort in the class. It seemed like everyone was open to sharing their thoughts for the most part, allowing us to learn from one another. I liked how Prof. Rhodes helped create this sort of environment through her ways of teaching.
I liked our projects most because they were creative and still taught us something.
I liked the class discussions
I liked the course material and the variety of things we learned. My instructor was very enthusiastic about the material and always made sure the class as a whole understood what we were learning.
I liked the instructor's teaching style but overall I did not enjoy the class because I am not interested in a lot of the content.
I loved how we talked about the readings and everyone was open to share their opinions. It's not just a sit here and take notes type class. Like you actually enjoy going to class.
none
professor rhodes is personable & welcomed comments and question that may have differed from her own thought process
she was very into the class and knew what she was talking about.
The class discussions were interesting.
The class was genuinely interesting, and the course materials (readings, movies etc.) largely contributed to my understanding of the materials.
The conversations in class
The environment.
The interest of being focused around women in general and the professor being a female. Loved the energy of the course.
The open discussions and movies we watched in class.

Demographic Data:

Essay Questions:

What factors about this class contributed the most to your learning? What aspects of this class helped you to learn to think critically?

Being a course focused around women and I'm a women myself. Interesting debates and issues discussed.
discussing the readings helped me most when learning in this class. and the short answer questions on our tests helped me think critically.
Exams made me think critically Most learning came from discussion of class material
How helpful of a teacher she was to me and my classmates and how we were always given interesting things to talk and read about
I didn't know much about the content of the class so I had to think critically for most assignments.
I enjoyed the readings and class discussion helped me to better understand what we□□ve read.
i loved the class discussions and the movies we watched.
Learning about the different things women have done.
Ms.rhodes allowed us to critically think about how the reading relate to one another and how it relates to things we see happening in the world.
none
she made me think from a different perspective
Taking the time to read each passage
The class allowed for a lot of interaction between the instructor and classmates. Interacting helped me understand and learn material better. Information stuck better when we spoke about the topics.
The class discussions were really helpful
The diversity of topics we covered in this class contributed most to my learning. Despite the range of topics, all of the issues we talked about were connected sometimes in more obvious ways and other times in more subtle ways. Finding these connections when they weren't quite as explicit helped me learn to think more critically.
the fact the the lectures were more discussion based helped to retain the information as well as keeping me intrigued.
The fators that contributed the most for me to learn in this class was the open discussions we would have.
The readings and hearing other peoples opinions contributed to majority of my learning in the class and having to dive deeper into the readings made me think more critically
The readings helped alot overall
The teacher had discussions with us instead of just lecturing or reading off a PowerPoint. She let us speak and participate which helped with understanding the material.
Things about women in the past
This course provided subject matter that I hadn't learned before. The articles we read encouraged me to think critically as they often included common subjects but viewed through a new perspective.
We had large class discussions about the readings every day which allowed us to relate real life experiences to the concepts we read about. Professor Rhodes also created a class wide google document at the beginning of the semester in which we were able to take group notes, complete/view test review materials and turn in work.

What factors about your own performance helped you learn the most? What did you do to facilitate your learning?

Asking questions in class really helped or taking my own notes on things i thought was important in class.

Essay Questions:

Being active in class
Being engaged in conversations, reading the assigned readings, and being able to relate back.
Doing all of the assigned readings helped me learn the most. To facilitate my learning, I took notes on the readings and made connections to course material.
Going to every class helped me learn the most.
have to do readings
I need to study a little bit more than I did before the tests, In order to make sure my learning was successful, I should have read things a little bit better.
I participated a lot during class discussions. I answered a lot of the questions asks and made comments.
I reviewed the class notes and read the reading. I studied the study guides and listen effectively in class.
I tried my best to get through all the assigned material so that I would have something thoughtful to add to the class discussions.
i would have read the material she gave us i went hard at the beginning of the semester because i knew she was a bit more relaxed when it came to reading and listening to requires homework
It was difficult for me to get here between working and some personal struggles, but having extra credit opportunities were a huge help!
Meeting with students in class helped me overall
none
pay attention in class
Paying attention in class helped
Reviewing over and taking the time to sit down and try and learn and comprehend the information in the readings and rewatching movies
the involvement in the class
When i did read, i felt prepared for class and I was not stressed but when I was too busy to read, I felt lost and confused in class.

Essay Questions:

None that I can think of other than having it more than just one day a week, but that was on my part scheduling wise

What could you have done to make the course an even better learning experience?

Honestly I could have eaten an actual meal before class rather than having to wait until break to get a snack.

Study more.

What did you like most about the class and your instructor?

I liked that everyone in the class was engaged and participated in class discussions

I loved the inclusiveness of the class and professor, we got to learn so many cool things about our history that I didn't even know existed and it was overall an enjoyable class.

The seminars and the queer walking tour

What factors about this class contributed the most to your learning? What aspects of this class helped you to learn to think critically?

Peer group discussions. The readings

Qwt and the queering the curriculum assignment helped me think critically about issues i did not fully understand before

The fact that all the assignments were all very unique contributed a lot to my learning experience.

What factors about your own performance helped you learn the most? What did you do to facilitate your learning?

I think that doing my work and actively paying attention in class, as well as participating in class really helped with learning the material.

Listening to other people perspectives

Essay Questions:

What changes, if any, could be made to the class that would have helped you to learn more? What could the instructor have done to make the course an even better learning experience?

I think focusing more on the notes about each reading and having a set study guide for the tests. Being that some of the readings were long, it was sometimes difficult to know what needed to be focused on the most in the readings or some of the readings were so long that I didn't finish

Essay Questions:

all of the reading before the due date.
I wouldn't change anything about this class. It is by far the most effective class I've been in.
Make the exam review more defined
More powerpoints ? Class notes were VERY helpful . Reading assignments were very long however
N/A
The changes that I would make is that the instructor puts grades in and grades the test or quizzes on time that way I can actually see my standards in the class rather than trying to play catch up towards the end of the semester.

What could you have done to make the course an even better learning experience?

ask questions, interact in class discussions
Engage more in the discussion.
I could have read ALL of the readings to help make my experience in this class better.
I would everything the same because I had a good learning experience.
N/A
Nothing really! Everything went well!
Speak more during class an actually engage

What did you like most about the class and your instructor?

Enthusiastic , open and not judgmental.
Fun assignments, interacted with class, class discussions
How outgoing she was and passionate about the topic
I liked how much passion my instructor had about the course and subjects that we discussed. It helped me pay attention and actually want to read the papers because I wanted to learn more about the topics.
I liked that we always have class discussions and everyone's feedback is always welcomed. I loved how enthusiastic my professor was. I think it helped motivate the class to engage in discussion.
I loved how we had multiple components of group work that we had to participate in and actually write it in a google drive where we all could see it. The instructor would also give us feedback in the google drive if things were what she wanted it to actually be.
She really enjoys teaching and is very engaged with her students
The reading were interesting
This class and the teacher are both very open in a sense where they make you feel open to speak your thoughts, all around its a good atmosphere, its a class you actually enjoy being in.

What factors about this class contributed the most to your learning? What aspects of this class helped you to learn to think critically?

Learning about how important women are in history and how it is often times over looked
Reading the articles that related to today's society. Reading beneath the surface and digging deep to find the major purpose of the article and why it is important.

Essay Questions:

The engagement of the discussion was a big help

The factors that contributed most to my learning in this class were the class discussions and readings. I think my professor helped me to think critically because she always pushed us to think out of the box.

The factors that really helped me was that the professor was so happy to talk about the situation every class. She challenged me by making me think of things that I never realized were happening to women in the first place. The study guides filling those out and actually talking about them before the test really helped me and boosted my confidence about the test every single time a test came forward.

The reading and in-class discussions helped the most toward my learning. Also collaborating with other students to answer questions helped me think critically.

This was a very interesting class and the content was eye-opening and very open ended with discussions which helps me want to be involved and think more critically.

What factors about your own performance helped you learn the most? What did you do to facilitate your learning?

Contributing to class discussion and being an active listener helped me learn the most during this course. Also keeping up with the readings helped.

I learned the most from being able to go back to the Google drive and focus on the things that I did not necessarily know after the class. I focused more on how it applies to my life and all the women around rather than just focusing on things that happened back then. I just paid attention more and started asking questions and engaging in discussion with my peers.

I made sure to attend class very often and do the readings.

Knowing that I needed to read before class to be able to participate.

Printing the readings before hand and taking notes on the margins while reading along with highlighting supporting statements or things I found interesting helped me learn the most. I tried staying on top of things by starting some readings early but this was a crazy semester so when classes were canceled the readings started to pile up or I read things that we never discussed.

Reading the article that was given and taking notes on it.

Essay Questions:

What changes, if any, could be made to the class that would have helped you to learn more? What could the instructor have done to make the course an even better learning experience?

It may have been more helpful for students if we figured out who we were going to interview in February simply because of how conflicting schedules could cause unexpected delays.

Nothing!

What could you have done to make the course an even better learning experience?

I could have done a better job at getting to all the readings.

Paid more attention to the readings

Essay Questions:

What did you like most about the class and your instructor?

Prof. Rhodes is clearly very passionate about documenting oral history and her energy was contagious.

The subject matter, classmates, and professor's style of teaching and availability were all great

What factors about this class contributed the most to your learning? What aspects of this class helped you to learn to think critically?

All of the assignments, readings, and class discussions were beneficial!

I was actually interested in the class material and did as many of the readings as I could to be prepared for class. I also regularly participated in class.

What factors about your own performance helped you learn the most? What did you do to facilitate your learning?

Being on top of assignments

I came to class prepared for discussion.

Essay Questions:

What changes, if any, could be made to the class that would have helped you to learn more? What could the instructor have done to make the course an even better learning experience?

cumulative exams are a bit much when you have other classes; be more avail outside of class for questions
DO BETTER ON FIRST TEST
I don't think i would make any changes. This class is fun and interesting. By far my favorite course this semester.
If we did the readings in class because I forget to do the readings sometimes.
Less reading .. but thats only because i dont like reading so much . Im a visual and hands on learner
more graded work assignments
more teaching, less readings
N/A
None (:
none, professor rhodes is an amazing professor.
Nothing she□□□s perfect
Some of the topics seemed a little repetitive so maybe just explore more topics within this particular focus, but overall I wouldn't change anything else.
talking about different things and not the same thing over and over again
the course is already good
There isn't much I would change except for some of the readings, a couple of them were very long and we would have multiple some nights.

What could you have done to make the course an even better learning experience?

ask more questions
attend all classes
attended all classes.
be more involved in the class
been more active in reading
came for all of the pop quizzes
Come to all classes so I wouldn't have missed quiz grades.
I could have came to every single class on time instead of coming at times 5 minutes late
I could have participated more in class.
I could've sat down and really made the time to get all of the readings and podcasts done instead of trying to cram them in the night before.
N/A
Nothing
Read all of the readings in a timely manner
read more
Reading the entire articles provided.
remebered some of the readings and movies that were assigned
Wake up earlier to make it to all classes and read every required reading

What did you like most about the class and your instructor?

her energy every class period
Her flannels and her swag . On a serious note, she was really enthusiastic about the criteria even on the days the students were unresponsive and dead
I liked how she actually liked the class and the things we talked about in class
I liked that everyone was very open and we weren't afraid to laugh at ourselves, everyone was very comfortable with one another.
I liked that it allowed me to think harder about the things that women go through and I like how the professor takes the time to explain things.
I really liked the enthusiasm that she had about the topic and I also like the information I□□□ve learned.

Essay Questions:

interesting documentaries and her interactive teaching style
she was clear on all assignments; test review
She□□□s dope! Her vide and spirit and the way she teaches and interact with the class
that we can talk and voice our opinion
The class was fun and very interesting. The instructor is passionate about this class that she teaches.
The discussions were always very interesting and informative. As a professor she is amazing, always very enthusiastic, and gets the class involved in discussions which helps us better grasp and understand the concepts.
There was no textbook, and Professor Rhodes was very passionate about the class.
used note card for exam
Very open to discussion and included everyone in all activities
Very open to discussion and very energetic and enthusiastic
What I liked most about my instructor is that she encourages to whole class to participate and her methods of teaching help set you up for success.
working in groups

What factors about this class contributed the most to your learning? What aspects of this class helped you to learn to think critically?

Feminism
Group discussion helped me think critically and it encouraged discussion.
group discussions
group discussions
I learned a lot of information from this class. I learned a lot of new stuff that i never knew before.
I liked that we did most of the class work all together in big, open discussion and in group work.
making note cards in prep for class
Study guides for tests, note taking, projects
The class discussions
the in class assignments
The interesting topics we read about and discussed in class impacting our learning. Also having questions asked helped critical thinking
the movies
the readings
The readings, videos, and podcasts outside of class were very helpful.
The various readings and the questions asked during the discussions really helped me think critically
The way i should study
when having class discussions

What factors about your own performance helped you learn the most? What did you do to facilitate your learning?

asking questions helped me learn the most
Be on time
Being active in conversations and doing the readings helped me to grasp concepts.
dedication to study
Definitely my use of the note card and the access to the student-made study guide was very helpful.
Did the work and listen to discussions. Read over notes and make study cards.
google drive
Learning how to use other methods on how to critically read.
My intellectual god given gifts from Zeus himself. On a serious note, the agenda was actually interesting . As a man I thought the agenda would be boring to me but the way it was taught made me think otherwise .
Note taking is key!
paying attention
re-reading the readings
stayin gon task and prepared
taking good notes; reviewing for test
Taking notes, making study guides and index cards
What helped me learn the most was that I came to class all the time so I could pay attention.

Essay Questions:

instructor have done to make the course an even better learning experience?

I dont think nothing could help me learn more that part is good for me because I have learned a lot. I have had a pleasant experience in this class all together.
I think maybe more visual aids for learning or maybe just writing more notes on the board. A lot of times i would be so interested in the discussions that I would forget to write notes.
I think that some more explanations for the projects and some more in class time will help.
I wish we would have discussed the readings more in depth because it was sometimes we would have certain questions on the test based off readings we didn't even fully go over in class and have a clear understanding of them.
If possible, have more podcast assignments instead of reading assignments. Also, have the projects spread out more instead of being focused on them at the end of the semester
If the grading wasn't so harsh when it comes to the test and quizzes and maybe class participation grades since we talk a lot in the class about the readings.
less podcasts, more interactive lessons.
Maybe more males enrolled in the course so that we can have their point of view on things and have debates
Not so many group work
Not sure there is anything.
Nothing. I loved this course.
One change would be the study guide the first test was good because everyone participated in it. The second test was hard because less people participated or they doing participate until the night before. I loved the study guide because I could look at it when studying if I had any questions.
The podcasts did not help as much as they could have. I feel like the monoraters didn't do as great job. The topics were interesting so maybe a different podcast platform would be better.

What could you have done to make the course an even better learning experience?

Better my note taking and studying.
I can't think of one thing.
I could have gone to class more. I missed a lot of classes, and I wish I hadn't. Because the stuff we talk about in class are conversations I've had many times before taking this class, I'm not always motivated to go.
I could have probably studied a little more but overall I think I studied hard for this class.
I could have written more notes.
I could've come to class more
I think I could have asked more questions and participated more
I would actually read the readings to where I understood them. I would also advise less readings that are as long as this semesters readings.
Nothing my learning experience was good enough
Participate more because it opens your mind up about the class and women themselves.
Read more of the required readings

Essay Questions:

Talked to my classmates more

What did you like most about the class and your instructor?

being able to talk freely without being afraid of having to sensor my words.

Everyone got along together and we were all females so that's what made it fun and every was open. The professor is also very open and likes talking to us.

How everyone contributed with their own opinions and discuss within the class our thoughts and how it ties into our society we live in today.

I enjoyed the professor nad the openness of the class. It was kinda like a hang out but for learning and I really enjoyed that.

I liked how we had open class discussions. It did not feel like a lecture

My professor was very enthusiastic and open to different opinions on subjects.

She is genuine, FUNNY and love what she does so her positivity spreads to the whole class!

She is very sweet and funny which helps the class become more comfortable

She made the class feel like it was a big discussion and it was informal but still formal.

She was very enthusiastic and you can tell she really likes her job and is passionate about it.

She was very passionate about the subject matter and her job. She truly cares about the well-being of her students and is always kind and accommodating to those who ask questions

She is very passionate about the class and it shows in how she gives lessons. She is not reading off PowerPoint slides, she is actively engaging with the class and course material.

The group discussions and relaxed vibe of the whole class

The high energy and familiarity with one another.

What factors about this class contributed the most to your learning? What aspects of this class helped you to learn to think critically?

being able to give facts a persuade someone on something even if I didn't believe it. (like what a feminist technology is)

Class Decisions and the ability to hear and share different options with others.

Group discussions, google drive notes, notes on white board

I have taken classes with this professor previously and I understand how she formats classes. I think class discussions helped think critically.

I think the class discussions were very beneficial because I was able to learn from other students' opinions and I think these comments helped me think critically about certain ideas.

I think the professor asked a question and left the rest up to group discussion. It helped me think critically in order to participate in the conversation.

It was interactive and didn't feel monotonous or boring

My professor as a whole contributed the most, of it wasn't for her enthusiasm and her caring heart I probably would have not succeeded in this course

She repeatedly stated things over and over so that we were able to fully understand what she was trying to tell us.

The articles, podcast, and readings we discussed in class to help me understand the material better.
