Estrategia de investigación: Capitalization and word order

All Attempts

Search engines tend to ignore capitalization and punctuation, so they are unlikely to affect the results of a search. However, word order can make a difference in some cases. Here are some tips to maximize your searches by considering word order.

Exploración 6-4 Búsqueda en internet. Now it's your turn to explore the status of LGBT rights in the Spanish-speaking world. Follow the steps to complete this activity.

- Try different versions and orders of your search terms. For example, some search engines, such as Google, prioritize terms according to the order in which they appear, so the first word is considered to be the most important.
- The order of the letters in an acronym may yield different results in your search, especially if the acronym is different or has a different letter order in Spanish.
- Does marriage equality exist in that country or region?
- Are there forms of same-sex unions legal in that country or region?
- Are there LGBT laws that may affect the results you get?
- While punctuation doesn't matter, spelling does! Misspelling a term or phrase can impact your results. Keep in mind, though, that many popular search engines will often automatically correct your spelling—sometimes correctly and sometimes incorrectly!
- Most search engines still don't differentiate between letters with and without accents, but it is preferable to type the words without typos.
