

### Writing Assignments #3

Is the article a peer-reviewed primary article? Yes

Guttman-Yassky, E. et al. Improvements in immune/melanocyte biomarkers with JAK3/TEC family kinase inhibitor ritlecitinib in vitiligo. PubMed; <https://doi.org/10.1016/j.jaci.2023.09.021> (2023).

Parts of this article which make this a primary article:

- The experiment was the first to explore molecular and cellular changes in skin and blood from participants with NSV at the gene and protein level in response to the oral JAK3/TEC inhibitor ritlecitinib in a randomized, placebo-controlled, phase 2b clinical trial, making it original.
- The methods section explains their process of experimenting and collecting data themselves
