ACCOMPLISHMENTS

-Interacted with customers daily to finalize transactions, resolve product issues and schedule repairs
-Cross trained in coworker duties, and used company software and internal documentation to resolve problems.
-Audited sales orders, accounts and kept documentation and logs up to date
-Generated reports for management on sales, scheduling, and inventories.
- Self studied for the CompTIA Security+ SY0-601 using various resources.
-Troubleshot Operating systems and upgraded hardware for mobile devices and workstations.
- Familiar with the following subjects: VirtualBox, Wireshark , pfSense firewall tables, Zenmap scanner, Nessus Vulnerability Scanner, Ubuntu Linux Command Line and User/Group Management, Python, PowerShell, Windows Server 2019, Microsoft Office Suite, Active Directory.

PERSONAL PROJECTS

- **Active Directory Home Lab**

  - Topics: Active directory, User management, PowerShell, Windows Server 2019, Virtualization,

  -Created a virtual network linking two virtual machines, a Windows Server 2019 VM with Active Directory installed and a Windows 10 VM to act as client. The Win Server 2019 was configured with domain name, configured with NAT and routing, and set up to provide DHCP to allow clients to be given an IP address and access the internet. A PowerShell script was used to create 1000 users in Active Directory.

- **Smartphone Hardware Repair**

-Topics: Smartphone, Hardware, Troubleshooting, data recovery, mobile device

- Repaired a Samsung smartphone with a broken digitizer. Used online repair documentation to deconstruct the broken mobile device and replace the faulty touch screen. Used Samsung Smart Switch application to transfer the damaged mobile device contacts, files, and applications to a new working mobile device.
