

# TalkAbroad Experience #2

in English

## Reflection

While talking with Karen about Nicaragua and natural medicine I learned many new things. We also talked about how her country's government is handling the COVID-19 Pandemic. We compared how our governments are handling the pandemic and came to the conclusion that both of our governments are not doing much to help their citizens. I also asked about how sicknesses like COVID-19 affect her country and how COVID-19 has affected her country. Lastly, I asked how her country is handling the pandemic. I learned that our countries are not as similar as my first partner's country. Nicaragua prefers to use natural healing herbs and medicines rather than prescribed medications. They rarely go to the doctor, because natural medicine heals most of their illnesses.

I enjoyed my conversation with Karen, she was very patient and understanding when I would use broken Spanish and encouraged me to continue. She shared a lot of valuable information with me that peaked my interest.

# TalkAbroad Experience #2

in Spanish

Mientras hablaba con Karen aprendí muchas cosas. Yo aprendí sobre remedios naturales para los tos, la fiebre, y la gripe. Cuando se le preguntó sobre cómo su país está manejando la pandemia, dijo que no lo está manejando bien y que es un problema. Yo también pregunto sobre cómo su país han afectado por enfermedades en el pasado como COVID-19. Karen dijo dos personas son infectada pero 16 tienen síntomas.

Yo tuve una experiencia buena y yo recomendé TalkAbroad a muchas personas. Me gustaría usar TalkAbroad en el futuro. Me gusto mi experiencia con mi pareja y no puedo esperar para hablar de nuevo.
