

### Journal Entry 11:

Some of the social themes that have been brought up in the video are just the vast names of the career and how they all come together. Even though many companies label their positions differently you are still working on some of the same aspects, such as phishing attempts, vulnerability protection and detection, and any cyber incident. Other social aspects of the job that was brought up were the requirements for that job and the difference between an entry level and a more advanced position. It talks about the different ways to gain experience and how the area of the job can affect the pay that one receives. It goes into aspect the demands of the job and how in the future the job field for cyber security will open vastly. Now she talked about how working as a team with a company helps improve your work opportunities and how networking is a great way to advance in the career, but she also brought up the point that many don't want to work a graveyard shift. Selecting areas that many don't want doesn't always mean your eager but is a great way to get a foot in the door and show potential employers that you are willing to go an extra mile to help that company.
