

## Journal Entry 14

To me the top five violations that I feel would have the most serious consequences are Using Unofficial Steaming Services, Faking Your Identity Online, Bullying and Trolling, Illegal Searches on the Internet, and Sharing Passwords, Addresses, or Photos of Others. I chose these ones because they are the most common ones I see in my line of work as a Military Police Officer. Most of the time I see these ones, they usually have malicious intent behind them. Most of the offenses I see with these usually involve some time of sexual content or they are trying to ruin the reputation of others. With these five offenses, I notice that many carry fines if not up to one year imprisonment. I find them in my top five due to be because they can affect not only adults, but children also especially the photos and faking identity. With AI nowadays, they can take the faces of others and put them onto explicit content ruining the reputation of their intended target. To me, the people that commit these crimes should always be prosecuted under theft, slandering or criminal charges if they are sexual in nature.
