Week 8 - Journal Entry 8

The media influences our understanding about cybersecurity because social media plays a big role in the cybersecurity world. With more people getting on media websites such as blogs, discussion forms, or even bookmarking, it can also show how to take security online seriously. It's always best to not talk to strangers online because it can increase cyberbullying and also can lead to people hacking your social media accounts. Moreover, the media also influences our understanding about cybersecurity. It entertains us, keeps us informed, and connects us with people worldwide but to also be aware.
