

The image below displays the output of several Linux commands: **echo**, **date**, **ls**, and **pwd**.

- The **echo** command prints any text entered after the keyword `echo` in the command line.
- The **date** command outputs the system's current date, time, and time zone information.
- The **ls** command lists the files and directories in the current working directory.
- The **pwd** command shows the path of the present working directory
