PROFESSIONAL SUMMARY

Cybersecurity student with hands-on experience in network defense, vulnerability assessment, system administration, and security labs. Experienced with Wireshark, Nmap, Metasploit, pfSense, Windows, and Linux through coursework, TryHackMe, and a personal Proxmox homelab. CompTIA Security+ certified with practical experience in network security, virtualization, system monitoring, and troubleshooting.

EDUCATION

Old Dominion University, Norfolk, VA
Bachelor of Science in Cybersecurity — Expected December 2026

GPA: 3.94

Dean's List: Fall 2025, Spring 2026

Relevant Coursework: Network Security, Cyber Defense Techniques, Operating Systems, Scripting Fundamentals

CompTIA Security+

Tidewater Community College, Chesapeake, VA
Associate of General Studies — Graduated Cum Laude

TECHNICAL SKILLS

Security & Networking: Wireshark, Nmap, Metasploit, msfvenom, pfSense, network security, firewall configuration

Operating Systems: Windows 10/11, Windows Server, Linux

Scripting: PowerShell, Bash, Python

Virtualization & Systems: Proxmox VE, virtualization, system administration, DNS filtering, remote access

PROJECTS & LABS

Personal Homelab Project

- Built and maintain a Proxmox VE homelab supporting multiple Linux virtual machines and self-hosted services
- Configured pfSense firewall rules, network segmentation, DNS filtering, and remote access
- Deployed and managed services including AdGuard Home, Plex, and game servers
- Perform system administration, troubleshooting, monitoring, and routine maintenance across virtualized systems

TryHackMe Cybersecurity Labs — 44+ Rooms Completed, Top 8%

- Completed hands-on labs covering network exploitation, privilege escalation, enumeration, and defensive security techniques
- Used tools including Nmap, Metasploit, Wireshark, and Linux command-line utilities in controlled environments
- Developed practical understanding of attack vectors, vulnerability identification, mitigation techniques, and SOC-related concepts

Cengage Cybersecurity Labs — Coursework

- Completed hands-on labs in vulnerability scanning, network defense, ethical hacking, incident response, and digital forensics
- Performed exploitation testing, traffic analysis, access-control configuration, and security hardening in virtual environments
- Applied tools including Metasploit, Nmap, Wireshark, and pfSense to cybersecurity scenarios

PROFESSIONAL EXPERIENCE

Chesapeake Pizza, Chesapeake, VA

Lead Line Cook & Dishwasher — Aug 2020 – Present

• Supervise line operations and coordinate team members during high-volume shifts to maintain efficient workflow

• Train and support team members while communicating priorities and resolving issues under pressure

• Manage multiple responsibilities in a fast-paced environment while maintaining accuracy, organization, and attention to detail

• Maintain clean and organized work areas in accordance with safety and sanitation standards
