complex systems to find potential vulnerabilities or other problems.

- **Problem-solving**: I can make fast and quick decision-making in a pressurized setting.
- **Communication:** I have strong verbal and written communication skills and I can convey technical information clearly.
- **Technical Proficiency**: I am proficient in using Security tools and software, handling network security principles, and technical hacking techniques.

- Presented findings and recommendations to a panel of industry experts.

Professional Development

- Traveled to DEF CON and Black Hat, and then locally attended meetups around cybersecurity—to know the trending industry foundation and network with professionals.
- Participated in online courses and webinars dealing with emerging cybersecurity threats and solutions.

Door dash May 2022 – October 2023

Accepting and Completing Orders:

I receive delivery requests through the DoorDash app.

As dashers we have the option to accept or decline orders based on their preferences.

Picking Up Orders:

I go to the specified restaurant to pick up the customer's order.

I need to wait in line or interact with restaurant staff during the pickup process.

Ensuring Order Accuracy:

Also as a dsher I am responsible for checking that the order received from the restaurant matches the details in the app.

This includes verifying the items and ensuring that any special instructions from the customer are followed.

Delivery to Customers:

Dashers deliver the orders to the customer's specified location.

Home Depot freight team November 2019 – December 2020

• Assisted in loading and unloading merchandise from delivery trucks for

quick processing and stocking.

• Picked and packed required merchandise from storage areas and delivered to sales floors.

EDUCATION

Potomac High School
Old dominion university
    Bachelor of Science in Cybersecurity
    • Relevant Coursework: Introduction to Information Security, Network Security, Ethical Hacking, Cyber Forensics
    Graduation: Month, Year
