

### Reflective Essay #3

Amanee Garcia

I have really enjoyed my team that I was selected to be in because as time has passed, we have stuck together to do good in this class. It has been stressful but any new information or sources that a person comes up with we share and don't keep it from the group. The team effort has been to make sure everyone understands and is on the same page. We met for the twelfth time and went over what are important keys to be successful when writing our 15-page essay. We assigned everyone in the group to write the first two pages and send it in a google doc so we can compare what we individually wrote.

We went over our papers a couple days later and mentioned what we liked on each paper and what needs to be added or removed. We came up with a list of items so we can add them to the first two pages to address the problem. We then went over our visual and how we see the application looking. We added fine details so that it would be easy to use for the elderly but also, so we are able to explain the innovation we are creating but be on the same page. Once we discussed this we moved on to the sources because as most of the paper being sources, we found to support our project we had to as well revise our selection. We all chose three sources and at this same meeting we went over our sources and the reason for why we chose them. As we reviewed the sources, we removed two that related more to children using technology and not the elderly and searched together to support our problem. This is close to our final meeting and the last one we will have until a couple days before the paper is due. We do feel more confident knowing that we are all in accordance and agreement with our decision for the innovation and built a repour where we are able to ask anything to each other and at least one person would know the answer each time which is also very comforting.
