

INFORMATION TECHNOLOGY INTERNSHIP NAVY EXCHANGE

REQUIREMENTS

Job requirements include:

- Knowledge of Computers and Electronics
- Active Listening
- Critical Thinking
- Complex Problem Solving

FURTHER REQUIREMENTS

Other requirements include:

- Judgment and Decision Making
- Systems Analysis and Evaluation
- Customer and Personal Service
- Reading and Writing Comprehension

CYSE 200T AND TEAMWORK

Skills I gained from CYSE 200T:

- Writing informative papers.
- Group skills through group assignments and projects.

- Informative papers are for writing reports on system issues and getting need-to-know information to necessary staff.
- Group skills can be used for team projects and assisting co-workers with IT issues.

CRJS 215S AND RESEARCH

Skills I gained from CRJS 215S:

- Making infographics that display essential information
- Streamlining research with annotated bibs

- Making infographics can transfer into flow charts and diagrams to help the company with logistical step-taking.
- Annotated bibs assist by keeping main points that can be used for presentations or summarizing documents.

CYSE 100 AND COMMUNICATION

Skills I gained from CYSE 100:

- Communication skills from attending Career Events
- Time Management skills from creating study calendars

- Communication skills are essential for consulting with management about concerns. This also applies to helping staff and customers with technical issues.
- Good use of time management and scheduling is effective in maintaining a successful work flow and reducing burnout.
