My Reflective Process (answer prompts 1-5 below in English to help you process your French learning this week):

1. Why did I select this artifact? What is the significance for me?

I selected this artifact because the lesson was talking about unemployment and currently Americans are being faced with rising unemployment rates due to COVID.

2. What did I learn from this artifact?

I learned that France is being similarly affected as well. The trends/percentages seems to stay fairly close if not the same.

3. How does the artifact reflect my strengths and interests? What have I done well? Name 1-3 items related to this artifact that you are proud of this week.

This relates to the cultural understanding in the lesson for this week. I took a ton of notes and reviewed the modules for extra help and understanding.

4. What was my biggest challenge when completing this artifact? Would I have done anything differently?

I had a hard time with the lesson this week. I'm not sure if it was getting back into French and homework after a break, or missing class and being sick, but I feel like I really struggled this week.

5. What can I improve on moving forward in my French learning process?
Get back into the groove. I was in a whack spot this week, time to shake it off and study hard!
