My Reflective Process (answer prompts 1-5 below in English to help you process your French learning this week):

1. Why did I select this particular artifact? What is the significance for me?

Duolingo is for me a very effective tool and I find myself using it for hours on end

2. What did I learn from this artifact?

I learned a few vocabulary words, mostly I worked on sharpening skills/things I already know

3. How does the artifact reflect my strengths and interests? What have I done well? Name 1-3 items related to this artifact that you are proud of this week.

I've always liked Duolingo though I'm not always great at maintaining my practice. I'm proud of maintaining a streak this week; going through the "People" category with no errors; and spending as much time with the work as I did

4. What was my biggest challenge when completing this artifact? Would I have done anything differently?

The biggest challenge was managing my time wisely and actually doing assigned work though Duolingo is a fun/helpful resource

5. What can I improve on moving forward in my French learning process?

Using resources like Duolingo and improving my listening skills
