

During this semester I had a interview with my professor Mrs.Sefcik, She had asked me many question in Spanish that I was able to respond to correctly and then she them asked me a certain question that I did not know how to answer well. So I was able to shift the conversation to a different topic.

The presentation that I had completed was the interview with my professor. What challenged me the most was trying to understand the Spanish by listening instead of reading it. I was giving no choice but to improvise and listening for key words to help determine what was being said. Trying to stick to vocab that I know also tried shifting conversation by controlling the conversation.
