### **Writing Assignment #3- Citation**

Yes, the article I found is a peer reviewed primary article. According to Nature, primary or original research articles have a minimum of six pages and 200 words, and the article I found fits that. The article also shows the dates where they were published and reviewed, and states the researchers' basic findings and methods without any extra information. It also states that it is a PMC article, and according to Nature, PMC articles are peer-reviewed.

Yes, the article is related to genetics because Marfan syndrome was a topic we discussed in class. The researchers in the article aim to experiment with Irbesartan, an inhibitor, to see the varying effects it has with children and adults with Marfan syndrome, specifically aortic dilation.

Mullen, M. Irbesartan in Marfan syndrome (AIMS): a double-blind, placebo-controlled randomised trial. PubMed, DOI: 10.1016/S0140-6736(19)32518-8.
