

Hannah Merica  
Parallel Major  
December 1, 2021

Nuclear Medicine is my parallel major if I do not get accepted into the nursing program at ODU. An interesting fact about our nuclear medicine program is that it's one of 75 nuclear medicine technology programs in the United States.

A career I could pursue with this major is Nuclear Medicine Technologist. They prepare and measure radioactive isotopes in therapeutic, diagnostic, and tracer studies using a variety of radioisotope equipment. They also prepare stock solutions, subject patients to radiation, and execute blood volume and lots more.

The advisor for this major is Sara Maynard.
