## DEPARTMENT OF HUMAN MOVEMENT SCIENCES PRACTICUM EVALUATION

Teacher Candidate: Alfred Vasta	Clinical Faculty: Ty Traister
School: First Colonia High School Grade: 9	Semester/Year: Fall 2019

Scale: 4 = Outstanding; 3 = Competent/Good; 2 = Improving; I = Unacceptable/Needs Work

PROFESSIONAL CONDUCT  1. Appropriate attire is worn  2. Arrives at agreed upon time  3. Notifies supervising teacher when ill or late  4. Contacts university supervisor if not teaching as planned  CLASSROOM MANAGEMENT  1. Start/stop signals are taught and used  2. Student reaction to signals is within 5 seconds  3. Positions self to see majority of students  4. Uses perimeter movement  5. Efficient use of space  6. Effective organization of students  7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME  1. Appropriate instruction time  2. Appropriate activity time  3. Effective use of wait time  4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE)  1. Student objectives are complete and appropriate  2. Teacher objectives are complete and appropriate  3. Appropriate progression of content/tasks  4. Content/tasks appropriate to student cognitive/motor skill level  5. Instructional plan is complete  6. Lesson plans are given to clinical faculty/supervisor on time	3	2	1
2. Arrives at agreed upon time 3. Notifies supervising teacher when ill or late 4. Contacts university supervisor if not teaching as planned  CLASSROOM MANAGEMENT 4. Start/stop signals are taught and used 2. Student reaction to signals is within 5 seconds 3. Positions self to see majority of students 4. Uses perimeter movement 5. Efficient use of space 6. Effective organization of students 7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME 4. Appropriate instruction time 2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 4. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time	3		1
3. Notifies supervising teacher when ill or late 4. Contacts university supervisor if not teaching as planned  CLASSROOM MANAGEMENT 4 1. Start/stop signals are taught and used 2. Student reaction to signals is within 5 seconds 3. Positions self to see majority of students 4. Uses perimeter movement 5. Efficient use of space 6. Effective organization of students 7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME 1. Appropriate instruction time 2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 1. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time			1
4. Contacts university supervisor if not teaching as planned  CLASSROOM MANAGEMENT  1. Start/stop signals are taught and used 2. Student reaction to signals is within 5 seconds 3. Positions self to see majority of students 4. Uses perimeter movement 5. Efficient use of space 6. Effective organization of students 7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME 1. Appropriate instruction time 2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 4. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time			1
CLASSROOM MANAGEMENT  1. Start/stop signals are taught and used 2. Student reaction to signals is within 5 seconds 3. Positions self to see majority of students 4. Uses perimeter movement 5. Efficient use of space 6. Effective organization of students 7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME 1. Appropriate instruction time 2. Appropriate activity time 3. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time			1
1. Start/stop signals are taught and used 2. Student reaction to signals is within 5 seconds 3. Positions self to see majority of students 4. Uses perimeter movement 5. Efficient use of space 6. Effective organization of students 7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME 1. Appropriate instruction time 2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 1. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time			1
2. Student reaction to signals is within 5 seconds 3. Positions self to see majority of students 4. Uses perimeter movement 5. Efficient use of space 6. Effective organization of students 7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME 1. Appropriate instruction time 2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 1. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time	3		
3. Positions self to see majority of students 4. Uses perimeter movement 5. Efficient use of space 6. Effective organization of students 7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME 1. Appropriate instruction time 2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 1. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time	3		
4. Uses perimeter movement  5. Efficient use of space  6. Effective organization of students  7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME  1. Appropriate instruction time  2. Appropriate activity time  3. Effective use of wait time  4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE)  1. Student objectives are complete and appropriate  2. Teacher objectives are complete and appropriate  3. Appropriate progression of content/tasks  4. Content/tasks appropriate to student cognitive/motor skill level  5. Instructional plan is complete  6. Lesson plans are given to clinical faculty/supervisor on time	3		
5. Efficient use of space 6. Effective organization of students 7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME 1. Appropriate instruction time 2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 1. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time	3		
6. Effective organization of students 7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME 1. Appropriate instruction time 2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 1. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time	3		
7. Efficient distribution of equipment  APPROPRIATE USE OF CLASS TIME  1. Appropriate instruction time  2. Appropriate activity time  3. Effective use of wait time  4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE)  1. Student objectives are complete and appropriate  2. Teacher objectives are complete and appropriate  3. Appropriate progression of content/tasks  4. Content/tasks appropriate to student cognitive/motor skill level  5. Instructional plan is complete  6. Lesson plans are given to clinical faculty/supervisor on time	3		
APPROPRIATE USE OF CLASS TIME  1. Appropriate instruction time 2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 1. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time	3		1
1. Appropriate instruction time 2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 4. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time	3	+	1
2. Appropriate activity time 3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 4 1. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time		2	
3. Effective use of wait time 4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE) 4 1. Student objectives are complete and appropriate 2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time			<del>-</del>
4. Minimal transition time between tasks/stations  LESSON PLANS (Health & PE)  1. Student objectives are complete and appropriate  2. Teacher objectives are complete and appropriate  3. Appropriate progression of content/tasks  4. Content/tasks appropriate to student cognitive/motor skill level  5. Instructional plan is complete  6. Lesson plans are given to clinical faculty/supervisor on time			<del> </del>
LESSON PLANS (Health & PE)  1. Student objectives are complete and appropriate  2. Teacher objectives are complete and appropriate  3. Appropriate progression of content/tasks  4. Content/tasks appropriate to student cognitive/motor skill level  5. Instructional plan is complete  6. Lesson plans are given to clinical faculty/supervisor on time			
LESSON PLANS (Health & PE)  1. Student objectives are complete and appropriate  2. Teacher objectives are complete and appropriate  3. Appropriate progression of content/tasks  4. Content/tasks appropriate to student cognitive/motor skill level  5. Instructional plan is complete  6. Lesson plans are given to clinical faculty/supervisor on time			
Student objectives are complete and appropriate     Teacher objectives are complete and appropriate     Appropriate progression of content/tasks     Content/tasks appropriate to student cognitive/motor skill level     Instructional plan is complete     Lesson plans are given to clinical faculty/supervisor on time	3	2	1
2. Teacher objectives are complete and appropriate 3. Appropriate progression of content/tasks 4. Content/tasks appropriate to student cognitive/motor skill level 5. Instructional plan is complete 6. Lesson plans are given to clinical faculty/supervisor on time			<del>                                     </del>
<ol> <li>Appropriate progression of content/tasks</li> <li>Content/tasks appropriate to student cognitive/motor skill level</li> <li>Instructional plan is complete</li> <li>Lesson plans are given to clinical faculty/supervisor on time</li> </ol>			<del></del>
Content/tasks appropriate to student cognitive/motor skill level     Instructional plan is complete     Lesson plans are given to clinical faculty/supervisor on time			<del>                                     </del>
Instructional plan is complete     Lesson plans are given to clinical faculty/supervisor on time			
6. Lesson plans are given to clinical faculty/supervisor on time	<u> </u>		
FEEDBACK 4	3	2	1
Equal balance of positive and corrective feedback	- J		1
Specific & general feedback is provided at appropriate times			
3. Feedback is congruent to the task			
4. Feedback includes student names (minimum 50%)			
ISADI ESAFAUTING INCOMPLICATION (N)	2		-
1. Begins each lesson with a complete set induction	3	2	
Appropriate content development			
3. Ends each lesson with a closure			
Assess student learning (motor skill, cognitive, affective)			
5. Provides for safety of students			
6. "With it"; knows what students are doing			
7. Task Presentation			
IMPLEMENTING INSTRUCTION (Health)  1. Lesson objective given clearly	3	2	1
Directions stated clearly			
4. End each lesson with a complete closure			
5. Relates current lesson to previous & future lessons			
6. Uses effective questioning techniques			
7. Uses a variety of methods	T		
8. Starts & stops class on time			
9. "With it"; knows what students are doing			

10	Han provinte signals for quisting along		1	1	
10.	Uses appropriate signals for quieting class				
-	PROFESSIONAL ATTRIBUTES	4	3	2	1
1.	Oral expression (articulate, expressive, animated, few grammatical				
L	errors)	V			ł
2.	Written expression (effective communicator, clear organization of				
	ideas, few misspellings/errors)				,
3.	Tact, Judgment (sensitive, diplomatic, thoughtful)	1/			
4.	Reliability/Dependability (self-starter, responsible, needs no reminders,	/			
	completes all tasks on time)	//			
5.	Self-initiative/Independence (creative, resourceful, independent, not			1	
_	passive)				
6.	Collegiality (team member, share ideas, does not work in isolation)				
7.	Interaction with students (outgoing, relates positively to students; not		_		
<u></u>	shy, hesitant, or antagonistic to students)				
8.	Desire to improve teaching performance (continually seeks feedback				
	for new & better ways of teaching; great effort to improve teaching	_ /		ĺ	
	performance)	V		Ì	
9.	Responsiveness and adjustments to feedback				
	Student learning potential (accepts responsibility for student learning;	/			<u> </u>
	remains positive about all students' ability to learn)				
11.	Professional ethics and demeanor (maintains high ethical &			<del> </del>	<del></del>
İ	professional standard; is trustworthy and discreet)	🗸			
		4	3	2	1

AREAS OF STRENGTH:

Classroom management, implementing instruction, using time well.

AREAS TO BE DEVELOPED:

Professional dress, positive feedback (specific)

OTHER RELEVANT/BENEFICIAL INFORMATION:

Hours Student Completed: 15 \_\_\_\_ 30 \_\_ 31+\_\_\_ (check one)

Signature of Clinical Faculty Member:

Date: 12/10/19
