

Watch [this video](#) and write a paragraph about how Ann's behavior is related to the need for cybersecurity. In addition, pay attention to the way that technological changes increased cybersecurity risks. By watching the video you will see that cybersecurity requires an interaction between human behavior and technology.

**Review the NICE Workforce Framework. Are there certain areas that you would want to focus your career on? Explain which would appeal the most to you and which would appeal the least.**

Ann's reaction to what she was doing was oblivious. She had no awareness that she could be getting phished by a scammer/hacker. Cybersecurity professionals are needed to look over these systems, putting up firewalls, looking out for any malicious attacks. As Ann contacted a professional in this scenario she was able to get the protection from these attacks like better passwords, watching out for unknown emails, and applying a firewall to filter what comes and goes on her connection.

Personally, the analysis role in cybersecurity peaks my interest as I look over large amounts of data and find similarities that cause problems in the future. The architect is a big no no from me as I don't think I'd be able to design those aspects. I have the lack of interest on the topic overall of building and designing systems.
