

1. The specific experiences of cybersecurity professionals would also vary across work roles. In this [video](#), Sandra describes seven reasons why individuals should consider a cybersecurity career. Pay particular attention the psychological fulfillment she describes from the job and the importance of psychology in cybersecurity careers. Based on what Sandra says, which factors do you find most interesting for those seeking cybersecurity careers.

One of the biggest fears everyone has, even personally, is that there are careers where the job isn't stable and their income could be cut at any time which is super unhealthy from an economic point of view. Having that confident mindset that the job won't just disappear because it's such a needed field is reassuring for myself. The competitive salary allows me to feel comfortable with being able to have a living of 50k+ out of college as a baseline, as most Americans worry about being able to pay their bills every month/day. Now the biggest one is not being bored! Being interested in your job 24/7 is the reason why I feel like a job can be enjoyable only if you actually care for it.

2. Review the following ten photos through a cybersecurity human systems integration framework. Create a meme for one of the photos explaining what is going on in the individual's or individuals' mind(s).

- https://commons.wikimedia.org/wiki/File:Summer_school_GLAM_gloria_1_1.jpg
- [https://commons.wikimedia.org/wiki/File:CellPhone_\(16491636068\).jpg](https://commons.wikimedia.org/wiki/File:CellPhone_(16491636068).jpg)

Explain how your meme relates to Human Systems Integration.

Well the obvious it's a dog trying to learn about Human System Integration and as a dog doesn't care for the technology systems it shows he thinks it stupid. Not knowing what the risk and safety of humans using technology is, I poke fun at the dog who has classes with no lenses trying to read the iPad.
