\$ ./filecheck.sh

Enter a filename: /home  
Directory exists.

(ibagw001@kali)-[~]

\$ ./filecheck.sh

Enter a filename: test  
It is a regular file, and the file exists.  
Hi this is a test

(ibagw001@kali)-[~]

\$ ./filecheck.sh

Enter a filename: random.txt  
File does not exist, creating file and inputing name...  
Here are the contents  
Isaiah Bagwell

(ibagw001@kali)-[~]

\$ cat filecheck.sh

```
#!/bin/bash
read -p "Enter a filename: " file
if [ -d "$file" ]
then
    echo "Directory exists."
elif [ -f "$file" ]
then
    echo "It is a regular file, and the file exists."
    cat $file
else
    echo "File does not exist, creating file and inputing name..."
    touch $file
    echo "Isaiah Bagwell" > $file
    echo "Here are the contents"
    cat "$file"
fi
```
