

## **Journal 15**

### **Question:**

**Digital Forensics | Davin Teo | TEDxHongKongSalon – YouTube Watch this video and think about how the career of digital forensics investigators relate to the social sciences.**

**Write a journal entry describing what you think about the speaker's pathway to his career.**

### **Answer:**

What I thought about the speaker, Davin Teo path into digital forensic is quite interesting. The speaker first talked about he was in accounting; however, he found a position that was open for IT in networks. And then he transitioned to the first national digital forensic startup in Australia, which was a completely new team. However, Davin, did not know anything about digital forensic, but still went through with it and he ended up trying it. This shows me that the field of cybersecurity has many paths throughout many disciplines and has a career for everyone. This is why my passion is to become a cybersecurity analyst, but I am always willing to try something new like David did. Furthermore David, ended up touching many different categories in technology, that helped him excel in his field.
