

IDS 300W – Term Paper Peer Review Worksheet

1. What's the clear, concise question this paper explores?

_____ Can artificial tools be suffocated enough to replace humans in cybersecurity?

2. Does the paper include insights from at least three disciplines? ____ What are they?

_____ economics _____

_____ Sociology _____

_____ Cybersecurity _____

3. Does the paper show evidence that the author has developed "adequacy" regarding each of the disciplines the paper includes? (That is, does the author seem to understand the key traditions and research designs associated with each discipline?) ____ yes ____

4. In what ways could the author enhance her/his discussion of the included disciplines?

_____ The Arthur can find a way to create common ground between the different disciplines in which they would be able to compare the perspectives of the sources. This would lead to creating more arguments and enhancing a solution for the question.

5. Does the paper meet the length requirement? __not yet _____

6. Does the paper include references to at least 5 defensible sources? __yes _____

7. Does the paper, its citations, references, tables, figures, etc. align with APA formatting conventions? _____yes_____ If not, has the author reviewed [this guide](#)?

8. What specific areas could be improved in terms of formatting?

They number one place, which can be improved in terms of formatting is the paper is structured in a way, which every paragraphs follows behind each other and they are structured with great detail. This I feel would help to aid my paper and will make the reader interested through the whole paper. The other areas that can be improved through my paper is the grammar and in text citations.

9. Are the insights the author has included in the paper interwoven in an effective way? ____yes they are.

10. In what ways could the author enhance the quality of the sections of the paper in which disciplinary insights are integrated?

The way in which the Arthur can enhance disciplinaries insights throughout the paper is by synthesizing the information throughout the sources, in which they can transition and spread all through there paper. They can also highlight the interdisciplinary insights from one source and create common ground to another source.

11. Is there ample evidence that the author has faithfully implemented the 10-step interdisciplinary research process? _____yes_____

12. In what ways could the author better demonstrate evidence of faithfully implementing the process?

The Arthurs paper should align with all the steps in the interdisciplinary process in which, the reader should be able to recognize the problem, that is being discussed. The reader should also be able to realize what are the different disciplines that are being included in the paper, and what are the arguments in which they are making throughout the paper. The reader should also be able to identify the side in which the Arthur is taking and what is the reasoning behind them choosing that side.
