

Prompt: Watch this video : [What does a Cybersecurity Analyst Do? Salaries, Skills & Job Outlook](#)

Think about how the description of the cybersecurity analyst job relates to social behaviors. Write a paragraph describing social themes that arise in the presentation

This job is considered the first line of defense when it comes to monitoring a network and responding to alerts triggered by security tools implemented in a system. Also developing tools that detect and prevent breaches on a network. This is a 24/7 entry-level job that tends to have lots of graveyard shifts. Marketing yourself is an important part of getting a job when it comes to new a industry requiring at least three years of prior experience. The entry position does mean that there will be social interaction at the help desk. This would be paperwork and research with flaws in the system. This might also look like training and teaching others of safer internet practices. This would help fight against social engineering attacks and others understand where they can help prevent an attack. The presentation goes into looking at geological locations with the economic themes

that come with the those locations. This would be cost of living in the area as well as the amount of competition that area produces. This also looks at the market with competition as there is less supply and more demand for hires in the area.

There are many paths to cybersecurity analyst which is why there is an importance in being able to sell yourself. This can be making your own experience, with internships or personal projects. This would help with learning networking skills and who people know helps getting the foot in the door. Resume is also quite great as it will help sell and frame you in a good light.
