

Team Meeting # 3

Part 1

Factor 1 – 5.4

Factor 2 – 5

Factor 3 – 2.2

Factor 4 – 6.6

Factor 5 – 5.4

Total average – 4.92

Scored roughly close to average except for factors 3 and 4 where I scored below for factor 2 and scored above average for factor 4

Part 2

Haven't gotten the responds from a friend's nephew yet until tomorrow.

Part 4

The idea that Tony presented has multiple ways you could teach elementary students about different fluid mechanics principles. You could easily make modifications to it to solve for different values. It is safe enough for kids to operate it with little help from adults and interactive enough for them to learn. If we could find a way for the water to be recycled back in to the bucket it would make it a bit more efficient.
