I would want to focus my career on Digital Forensics out of the options on the NICE Framework. Last semester in one of my cybersecurity classes we had a special guest from the FBI come and talk to us about his role with the FBI. His role was Digital Forensics. He talked about how they used a car from a truck to solve a murder. I love solving stuff so to be able to solve a crime using my love of cybersecurity would be amazing. IT is the least appealing to me out of all the options on the NICE framework. I have experience with how IT works and I don't like it. I just don't think IT is what fits me. My strengths as of right now are analyzing things, investigating things, etc. But who knows, maybe when I continue to work through my degree I'll end up changing my mind.
