

Socket Programming

Angel Tanoh & Jessica Frimpong

Details about our Project

- For this project we'll be making a program that helps people find a forgotten song. For this website people will be able to type in parts of a song lyric.
- Once the user hits the search button there will be a list of verses from different songs and artists that have the same lyrics they were looking for.
- Our program will have a feature that allows users to go through a list of verses from different songs. The program will contain strings of different songs.
