

## Week 1 – Journal Entry

Areas that I am most interested in focusing on my career in is in the Protection and Defense category. Why careers in this category interest me is because updating cyber defenses against attackers sounds the most fun to me. Another area that interests Investigation where I will use my skills to gather information on an assumingly bad person.

All these different kinds of jobs seem like something I would enjoy doing; however, the Implementation and Operation area seems the most uninteresting. I don't want to be the one planning out what to do, I want to put my skills to use and make the thing the company needs.
