Professional educator with a passion for computer science and cybersecurity. Nine years of experience working for the Department of Defense Education Activity (DODEA) at NSWCDD supporting children, parents, and personal growth. Pursuing long term career goals by completing a Bachelor's degree from Old Dominion University in Cybersecurity while working full time. Team player with professional written and verbal communication skills and a strong work ethic. Well versed in network security, cybersecurity policy, and computer architecture. Fluent in C++ and Python. Eager to apply and strengthen my new skills in a technical environment.

Experience

2015 – PRESENT
Educator/Child Development Center, NSWCDD
Provide direct care in a classroom learning environment for preschool aged children. Responsible for creating and maintaining a safe and functional classroom that promotes learning, creating a curriculum that references accredited educational sources, and maintaining strong written and verbal communication between parents and other educators in the classroom. Teach children computer literacy and responsible usage. Travel to different Navy installations for training seminars and events to maintain teaching credentials.
