

```
john@john-VirtualBox: ~  
To run a command as administrator (user "root"), use "sudo <command>".  
See "man sudo_root" for details.  
  
john@john-VirtualBox:~$ echo "John Monrouzeau"  
John Monrouzeau  
john@john-VirtualBox:~$ date  
Sun Aug 31 06:28:37 PM EDT 2025  
john@john-VirtualBox:~$ ls  
Desktop Documents Downloads Music Pictures Public snap Templates Videos  
john@john-VirtualBox:~$ pwd  
/home/john  
john@john-VirtualBox:~$
```

The "echo" command repeats whatever it is prompted to repeat

The "date" command gives the date and time

The "ls" command lists the contents in the current directory

The "pwd" command shows the active directory, stands for "print working directory"
