Echo copies anything you say after you type the command

Date tells you the date and time in military time

The LS command list files and directories

PWD command is used to display the absolute path of the current directory you are working in.

Kjhon fletcher

My experience with this lab was pretty good; it went well, and it was my first ever lab, time using Linux at all. I didn't really face any challenges, and this lab took about 10 minutes, maybe. I learned how to list files, date, and echo as well. Uploading the first cyber kali onto my device was pretty tricky, but eventually I learned how to do it.
