

CYSE 270 - Assignment 2-Working with
Command Line. Kjhon Fletcher | Professor - AL
KINOON

STEPS 1 - 7

On this assignment, I had to work a bit more on the coding and learn how to do more complex coding. This was a little harder for me, and one of the first times I've been challenged this way in the class. I learned how to do a lot of things here, one of the most important being file management, grouping, and command lines. I've faced challenges with grouping them, which was a struggle for me, but I persevered and learned how to do it.
