CYSE 270 Linux System for Cybersecurity
Assignment #1- Create a virtual machine

Mackenzie Coleman
UIN: 01178518

Task A: Create a Linux VM

1. Follow the instructions on the following textbook to install Ubuntu VM in Oracle Virtual Box.

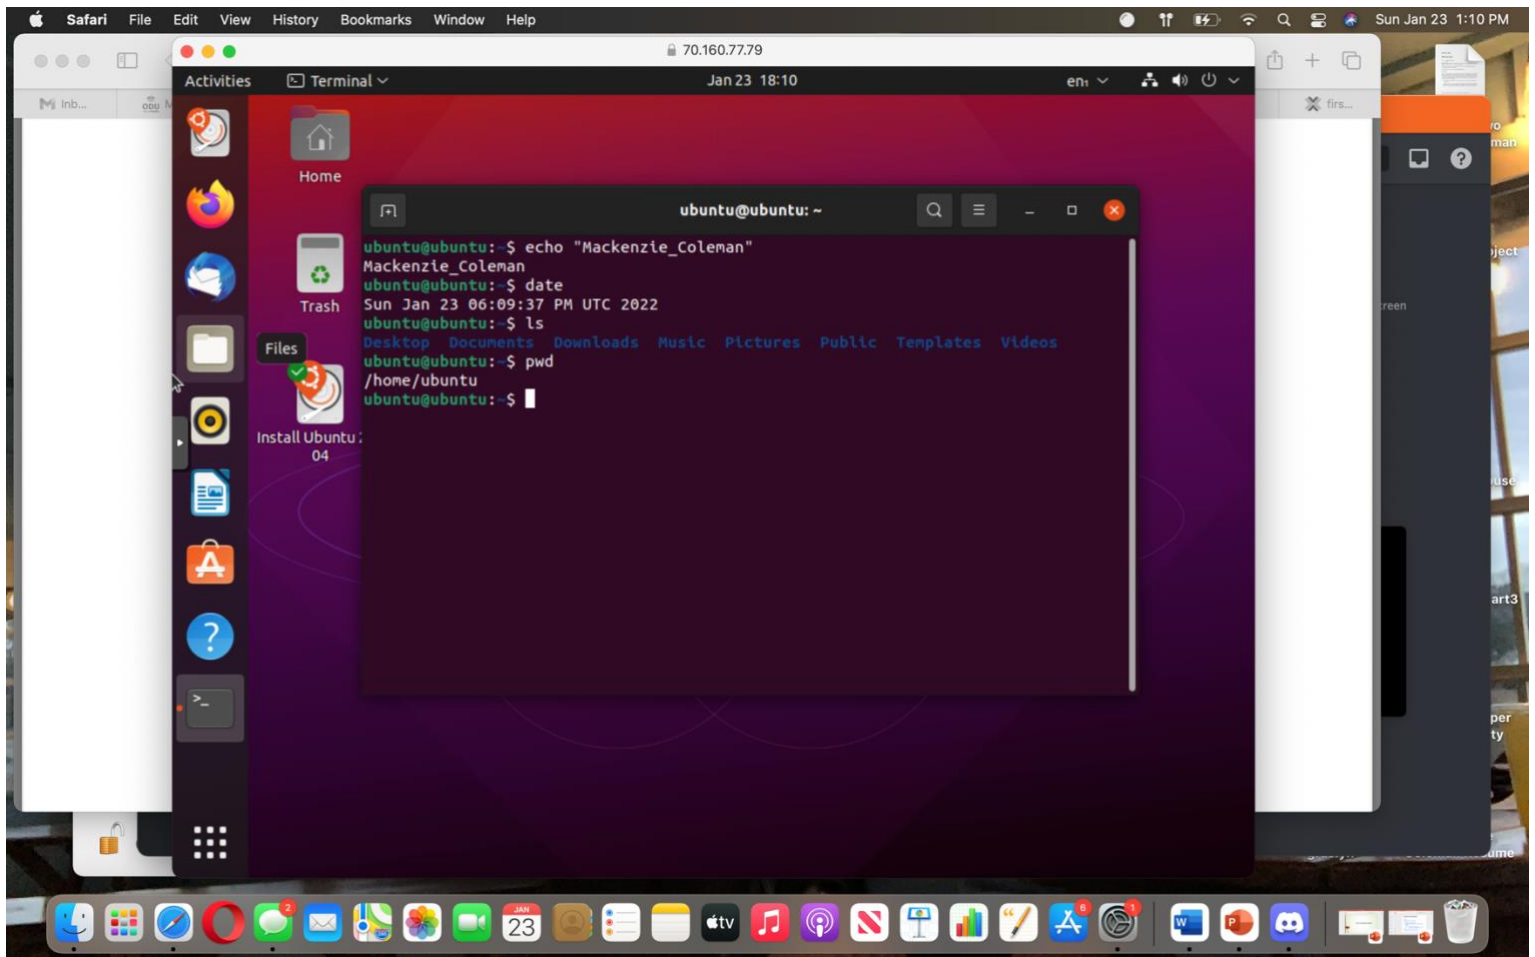

Above is a screenshot of the page immediately after downloading Ubuntu Desktop including the time stamp of the screenshot.

Task B: Command practice

1. Once you have installed Ubuntu VM, open the terminal, and execute the following commands:

1. Echo "your_name" (Mackenzie Coleman)
2. Date
3. ls
4. pwd

This screen shot is showing all four commands being executed in the home directory.
