I would like to do a health tourism in Spain because of the country's history, culture, sports and after reading the article "The healthcare system in Spain" I feel comfortable about this country providing Healthcare. The biggest difference about Healthcare between Spain and USA is Spain provides free Healthcare which is paid partly by social security payments which will be deducted from your wages. In the United States you will have health care coverage from your work or Obama Care. Also abortion in Spain is legal for the first three months of pregnancy while very most states in this country the average of abortion is 20 weeks.
