

Free Write #2

November 3, 2021

Use the letters of the word CYBERSECURITY to list legal ways to make money in cybersecurity.

Consult companies using your cyber security knowledge to strengthen their networks.

Youtube channel that talks about cyber security related stuff.

Build security applications and publish them on the app store.

Educate others and become a cyber security tutor.

Red team for a company.

Sell cyber security products for a company. Sales is a great way to make a lot of commission.

Enter hacking competitions for money.

Create a startup.

Upwork is a great freelancing site.

Recovery specialist is someone who can recover data from hacked devices.

IoT specialist is someone who protects network connected devices.

Train others by creating a course on sites like Udemy.

You can write books about cyber security. (cop out I know!)
