

Journal Entry #2

November 4, 2021

Journal. Watch [this video](#) about a 12-year-old cyber security expert. Pay attention to how he has embedded himself into the cybersecurity culture. Also, pay attention to how the ideas of knowledge, technology, and secrecy relate to his expertise. Write a journal entry about your thoughts related to the video.

This child has very impressive technical knowledge at such a young age. He used a phishing page to lure the reported into giving up his personal twitter account information. It appears he also has quite the understanding of at least the basics of networking. It seems that he has parents that are in the tech field which I think plays a huge role that helped him grow so fast. Its all about what you surround a kid with as to what they will take interests in. That and a pair of supportive parents will make any kid succeed.
