1. Voy a la doctora para un chequeo cada año.
2. Mis sintomas son alergias (usually).
3. No tomo ningun medicamento (I do take Zyrtec and Claritin sometimes though).

One thing that jumped out to me in the article was that you will most likely have free healthcare if you are living and working there. I think that is really awesome and helpful to so many people, I wish we did that in America. The article said that about 90% of people in Spain use the free healthcare, which is great, another interesting fact from the article was that if you are under 26 and studying in Spain, you can receive free healthcare!
